Q: Are we able to facilitate live-streaming and virtual chat?

A: Yes, plus a whole lot more!

- **Effective ~~June 1, 2024~~ January 3, 2026**

Let us now plan to "live stream" the next official monthly **Face-2-Face General Assembly Session** online at our website... At our next meeting, attendees can begin to make recordings whereby **anyone, using a cellphone on a tripod**, may run a recording where your work can be live-streamed to **whatever channel** that you create and publish here in this file system.

- Jim Homyak will publish all the instructions. You get to create your role in the assembly and continually publish to that content to uplift and support the entire assembly.
- We can publish the links in advance to use for meeting recordings and minutes.
- Okay everyone, here's my latest idea to hop into our own conference rooms ~ Jimmy first pass of trying this 'live streaming' from home with low light levels and low audio levels. At the very least, we are up and running, for \$0.00, as a proof of concept.
